

# ***Liberator Tread Brake Truck***

The **Liberator** line of tread brake trucks offer excellent load control, even in adverse weather conditions in a lightweight, ergonomic design.

- Superior brake design that makes others obsolete.
- Brake components are heavy gauge steel and powder coated for corrosion resistance and long life.
- Single cable and equalizer bar provide consistent braking action even with uneven tire pressure.
- Brake shoe assemblies have been redesigned to provide maximum leverage and braking action. Square shoes last much longer and won't tear up tires like paddle designs.
- Available with most handle styles in both "T" rod and cable design.
- Optional pull out bar eliminates driver using foot to remove hand truck for better ergonomics.
- Kits are available to upgrade current hand trucks to the B&P tread brake system.
- Two Year Warranty.
