

**Problem: The growing market of craft beer has led to a variety of delivery challenges**  
**Solution: The *Liberator* Sliding Keg Hook Truck**

Dozens of handle styles available, including a line of heavy duty heat treated styles.

Steel nose plates slide under kegs with ease. We offer a variety of other sizes in steel and aluminum.

The B5MK frame features curved cross members and an adjustable sliding keg hook-ideal for any keg or case. Adjustable hooks hold the kegs to the truck, even when stacked.

Pro-Flex® 8" wheels are lightweight and come with a 2 year warranty. Many other 8" and 10" wheels are available.

- **Safety First** - Securely stack 2 or 3 kegs without the worry of tipping or rolling off.
- **Improved Ergonomics** - Easy to pull back even with two full kegs.
- **Better Maneuverability** - The narrowest hand truck in the industry with our optional "narrow aisle" design. Easier to deliver in tight coolers, narrow aisles and through doorways.
- **Increase Efficiency** - Drivers can deliver faster with kegs held securely in place.
- **Negotiate Stairs with Ease** - Ergonomic stair climbers (optional) and a secured load makes stairs far less challenging.
- **Two Year Warranty!**

***Our exclusive design allows you to haul all kinds and sizes of kegs - together.***

**Suggested Transport Configurations:**

- Two ½ barrel kegs on the bottom and one ½ barrel or ¼ slim barrel keg on top. (Must use an 18" wide nose plate.)
- One ¼ slim barrel keg on bottom and one ¼ slim barrel or ½ barrel keg on top.
- One ½ barrel keg on bottom and one ½ barrel keg on top.
- One ½ barrel keg on bottom and one ½ barrel keg on top.
- Single or double stack cases instead of kegs.
