

Pallet Dollies

Pallet dollies are used for transporting loaded pallets over short level distances. They enable any operation to keep material movement going without pulling the forklift away from other duties.

- Lightweight and easy to maneuver.
- Available in 4,000, 6,000, & 8,000 lb. capacities.
- Rugged construction of extruded aluminum with steel axles.
- Tilt and non-tilt versions available.
- Welded aluminum deck available forming a solid top.
- Optional center support crossbar.
- Optional handle and handle loops.

Tilt Type Dollies Roller Configuration

4,000 lbs capacity - 6 Roller

6,000 lbs capacity - 8 Roller

8,000 lbs capacity - 10 roller

P/N	Description
