

# Newly Designed **Liberator** Disc Brake Truck

**When safety comes first!**

## Re-engineered For:

- Greater strength in a **simpler** design!
- **Less weight** along with enhanced ergonomics!
- More options to build the specific truck **You want!**
- **Total stopping power** regardless of weather conditions!

**b&p Manufacturing**  
Engineered Delivery Products

**2 Year Warranty On All**

**"Made in the USA"**

**B&P Products!**

Multi position adjustable brackets to accommodate individual driver hand sizes. Shown with A11 handle but you choose the handle style you want.

### All Steel Parts Black Powder Coated

- Protects better
- Lasts longer
- Won't tarnish

Optional spring loaded pull bar for easier unloading. Driver no longer has to use his foot to pull truck out from under load.

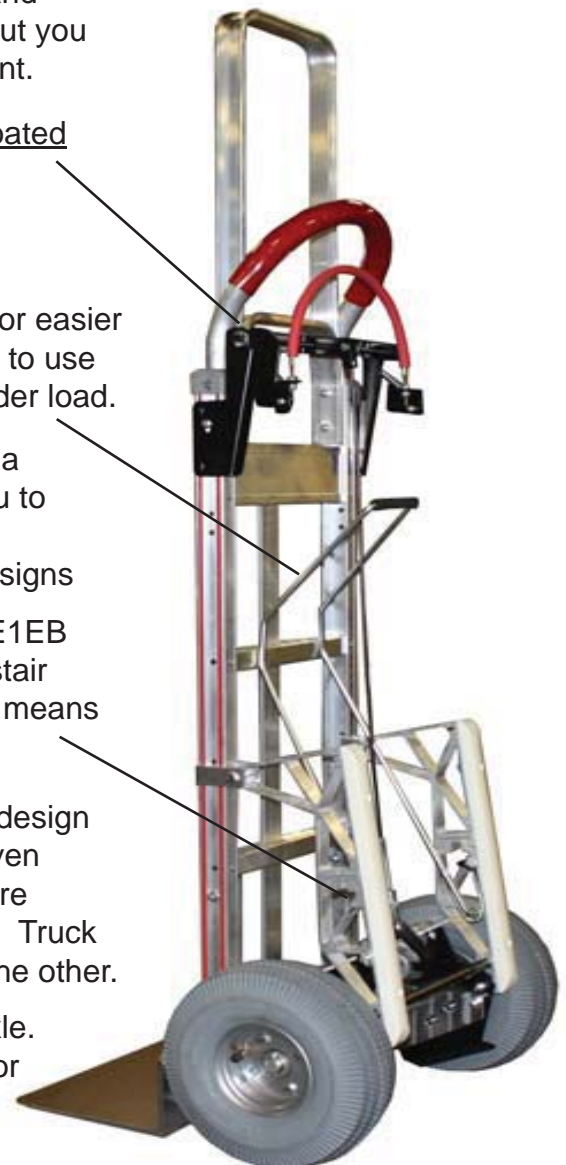

Stronger coated cable features a steel yoke at the top. Allows you to adjust braking response. Won't bend or brake like rod designs

Almost straight up and down #E1EB ergo stair climber. More of the stair climber rides on the stair which means less strain on driver's back.

Equalizer bar and single cable design ensures consistently smooth even braking on both sides, even if tire pressure goes low on one side. Truck won't pull more to one side or the other.

New 1 piece heavy duty 3/4" axle. Axle brackets are guaranteed for life not to crack or break.

**Take advantage of our 30 day  
no obligation demo program!!!**
